21 RAUNAS STABURAGS

This cliff is a unique nature object of the post-glacial period and the only freshwater limestone formation in Latvia. It is found in the valley of the Rauna River. It has formed 8 - 10 thousand years ago, when the limestone settled and hardened on the surface of the soil. The spring that today flows over Staburags continues to grow it by the process of calcification - about 0,4 - 0,8 mm per year. It is about 3,5 m high and 17 m wide, but the total length of the step-like cliffs is 35 m.

120 RIŅĢI BROTHERHOOD CONGREGATION HOUSE

Venue for spiritual and cultural events. In the second half of the 19th century, there was a widespread movement of the Hernhutian Brethren, which resulted in the formation of the Ringi Brothers' House, which is one of the few preserved Brothers' Congregational Homes. The memorial stone of Ķikuļi Jacob is nearby.
